

Noble Earth Technologies  
**Algae Gloom**

**CAUTION – POISON**  
**KEEP OUT OF REACH OF CHILDREN**  
**CONTAINS**

Noble Earth Technologies 'Algae Gloom' is used to control algae and black spot in swimming and therapeutic pools and air conditioning waters. 'Algae Gloom' will control algae and mould growth on surfaces, such as tiles, bricks, concrete, fibro, artificial grasses and coatings.

**DIRECTIONS FOR USE:**

Situation	Pests controlled	Rate	How to apply
Therapeutic and spa pools	Algae	Initial treatment: 200mls per 10,000L of water Preventative maintenance treatment: Weekly to monthly 200mls per 10,000L of water	Use in conjunction with chlorine treatment
General Use	Algae and mould	30mL per 5L of water	Do NOT rinse treated surfaces
Walls and floors (tiles, concrete & fibro) and pathways	Algae and mould	1L – 2L per 100L of water (depending on level of soiling)	Use after pre-cleaning treatments
Golf courses and bowling greens, bunkers and sport turf areas	Algae and mould	1L per 100L of water	Spray onto affected areas and allow to dry

**Pools** – For a pool with a capacity of 10,000L, the initial summer dosage would be 250mLs and the weekly to monthly dose would be 170mLs. The monthly winter dose or for heavy algae control would be 600mLs.

**GENERAL INSTRUCTIONS:**

**Swimming pools, spa and therapeutic pools** - Noble Earth Technologies 'Algae Gloom' must be used with a registered sanitiser when the pool is used for bathing. To prevent the water from appearing hazy, the product should NOT be added for at least 6 hours after super-chlorinating the pool. However, during normal dosing, this delay is NOT required. Use this product monthly or if under high-bathing load use weekly. For spa baths, use in conjunction with a cleaning product. Calculate the volume of a pool by multiplying the length x width x depth of pool in metres x1000 to give volume in litres. Direct contact with prescribed goods must be prevented and treated surfaces adequately drained before proceeding operations.

**Winter maintenance** – If pool is sanitised using chlorine, treat pool over 3-4 weeks. After application of this product, filter water for 12 hours to ensure mixing, and then brush pool walls thoroughly and vacuum. Only use in high dosage rates when pool is not in use, e.g. heavy algae and winter dose rates.

**For general algae and mould control** – Clean surface with an appropriate cleaner, such as Noble Earth Technologies 'Multi-Cleans Stain Shift' or Noble Earth Technologies 'Stone and Concrete Wash'. Apply the solution of 'Algae Gloom' to the cleaned surface and allow to dry. This will stop spore growth and maintain a clean, presentable surface. For further application details and technical information and uses please consult with the Noble Earth Technologies technical department.

**For grasses and vegetation** – 'Algae Gloom' is ideal for golf courses and bowling greens, bunkers and sports turf areas.

**For piggeries, hatcheries and dairies** – Use 'Algae Gloom' as a sanitiser after pre-cleaning. Refer to the General Use section of the Table for application rates.

**SAFETY DIRECTIONS:** Not to be used for any purpose or in any manner contrary to this label unless authorised under appropriate legislation. Store in the original container in a cool dry place out of reach of children. Do NOT store in direct sunlight. Triple rinse or preferably pressure rinse containers before disposal. Add rinsings to pool. Do NOT dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point. If NOT recycling, break, crush or puncture and bury the empty containers in a local authority landfill. If no landfill is available, bury the containers 500mm or deeper in a disposal pit. Empty containers and this product should NOT be burnt. Will irritate the eyes, nose, throat and skin. Avoid contact with eyes and skin. Do NOT inhale vapour.

**FIRST AID:** If poisoning occurs, contact a Poisons Information Centre (phone 13 11 26 from anywhere in Australia) or a doctor. If skin contact occurs, remove contaminated clothing and wash skin thoroughly. If swallowed, do NOT induce vomiting. Give a glass of water. If in eyes, hold eyes open and flood with water for at least 15 minutes and then see a doctor.
