

Noble Earth Technologies  
**Fly Away**

---

**CAUTION – POISON**  
**KEEP OUT OF REACH OF CHILDREN**  
CONTAINS 452g/L POLYBUTENE

**DIRECTIONS FOR USE:** Do NOT apply to excessively wet surfaces or on deposits of ice or snow.

**Situation** - Ledges, sills, railings beams, and surfaces where exotic birds roost.

**Pests** - Exotic birds such as pigeons, starlings and sparrows.

**Rate of application** - 350mL per square metre. Ready to be used, do NOT dilute.

**Preparation** - Remove deposits of droppings from areas to be treated. Ensure that all surfaces are dry. Inspect treated surfaces at 6 monthly intervals and re-treat if necessary.

**Application** – Application is similar to that of paint, use a brush or roller and cover the entire area (horizontal surfaces).

**Removal** - Clean up after application and remove product from treated surfaces with a solvent cleaner, such as Noble Earth Technologies 'Lift Off Degreaser'.

**Mode of action** - Because of the tacky nature of this product, the birds experience feelings of insecurity and discomfort, and as a result, will not settle on areas treated with this product.

**NOTE:** Birds will not be trapped by this product. If Noble Earth Technologies 'Fly Away' is proving difficult to apply, due to cold climatic conditions making it too viscous, it will need to be heated by some means.

For further application details and technical information and uses please consult with the Noble Earth Technologies technical department.

**SAFETY DIRECTIONS:** Do NOT contaminate streams, rivers or waterways with the chemical or used containers. Not to be used for any purpose or in any manner that is contrary to this label, unless authorised under appropriate legislation. Store in the original container (closed) in a well ventilated area, as cool as possible. Do NOT store for prolonged periods in direct sunlight. Triple rinse or preferably pressure rinse containers before disposal. Dispose of rinsings in a disposal pit, specifically marked and set up for this purpose, clear of waterways, desirable vegetation and roots. Break, crush or puncture and then bury empty containers in a local authority landfill. If no landfill is available, bury the containers 500mm or deeper in a disposal pit. Empty containers and this product should NOT be burnt.

**FIRST AID:** If poisoning occurs, contact a Poisons Information Centre (phone 13 11 26 from anywhere in Australia) or a doctor.
