CONTAINS XYLENE 400g/L ETHYLENE GLYCOL MONOALKYL ETHER ACETATE 230g/L

RESIN SOLUTION  
FLAMMABLE, N.O.S,  
UN 1866

Noble Earth Technologies 'Graffiti Guard' is an acrylic copolymer solution designed to resist permanent penetration of Graffiti markings. In addition, the Noble Earth Technologies 'Graffiti Guard' has been formulated to allow the removal of these undesirable markings without breaking down under the chemical cleaning agents. This provides a long-lasting durable clear finish and may be applied over masonry and painted surfaces, timber, paper, tiles, terrazzo and metal.

**DIRECTIONS FOR USE:** During the application of Noble Earth Technologies 'Graffiti Guard', the product has a pot life of approximately 60 minutes, depending on the temperature. This figure of 60 minutes is calculated at 20°C. The coating is normally touch dry within 4 hours and fully cured after several days. One coat is usually sufficient; however, several coats may be applied. The second application cannot be applied until 4 hours has elapsed since the first coat and no later than 24 hours.

**Coverage** – is approximately 10 square metres per litre.

Noble Earth Technologies 'Damnation Degreaser' or 'Graffiti Remove' – As supplied Part A and Part B are pre-measured and should be mixed together and used as one batch. However, if smaller quantities are required you may mix any amount of Part A with a solution of Part B. The amount of Part B required must not be more or less than 28% of the Part A, which is to be mixed. If left open to the air or re-opened too many times, Part B will set due to moisture in the air.

**NOTE:** Test the substrate prior to application to ensure Noble Earth Technologies 'Graffiti Guard' is compatible; some paints can be damaged by Noble Earth Technologies 'Graffiti Guard' application.

**SAFETY DIRECTIONS:** Flammable. Irritating to the skin. Harmful by inhalation, in contact with skin and if swallowed. Avoid contact with eyes and skins. Avoid breathing vapour. In case of insufficient ventilation, wear suitable respiratory equipment. Keep away from sources of ignition – No smoking. When using, do NOT eat or drink. Do NOT empty into drains.

**FIRST AID:** If poisoning occurs, contact a Poisons Information Centre (phone 13 11 26 from anywhere in Australia) or a doctor. If swallowed, do NOT induce vomiting. Give a glass of water.
