

Noble Earth Technologies
Grime and Slime Degreaser

CAUTION - POISON
KEEP OUT OF REACH OF CHILDREN
CONTAINS 320g/L LIQUID HYDROCARBON

FLAMMABLE LIQUID,
N.O.S. UN 1990

Noble Earth Technologies 'Grime and Slime Degreaser' is a natural renewable resource based on quick break degreaser, and therefore, is suitable to be used in situations where plate grease separators are used. It is heavy duty based and can be used in all industries to remove wet grease, heavy oil stains, tar, waxes and ink.

DIRECTIONS FOR USE: In most cases, use Noble Earth Technologies 'Grime and Slime Degreaser' neat. Spray or brush onto a dry surface, leave for a few minutes to allow for penetration (agitate very soiled surfaces) and rinse off with water (hot or cold). For a more economical degreaser, Noble Earth Technologies 'Grime and Slime Degreaser' can be diluted with three parts solvent (e.g. Kerosene). As with all degreasers, a test sample should be tried on an inconspicuous section to assess surface compatibility.

For further application details and technical information and uses please consult with the Noble Earth Technologies technical department.

SAFETY DIRECTIONS: Do NOT swallow. Do NOT use near naked flame. Use in well ventilated areas. Use safety equipment at all times.

FIRST AID: If poisoning occurs, contact a Poisons Information Centre (phone 13 11 26 from anywhere in Australia) or a doctor. If swallowed, do NOT induce vomiting. Give a glass of water. If in eyes, wash material from eyes with running water for at least 15 minutes and then consult a doctor. If on skin, wash with soapy water. If inhaled, seek fresh air.
