

Noble Earth Technologies

Hydro Wetting Agent

SOIL CONDITIONER AND WETTING AGENT

Directions: Dilute 1 Part Noble Earth Technologies Hydro Wetting Agent with approximately 100-120 parts water, 1 litre of this dilution will treat 350 Sq. metres.

For best results treat the area two times per year approximately every 6 months. For localised dry spots and heavily compacted areas a repeat application may be necessary.

This product may be used in conjunction with other Noble Earth Technologies chemicals such as fungicides, herbicides, insecticides and soluble fertilisers.

FIRST AID: If poisoning occurs, contact a Doctor or Poisons Information Centre (phone 13 1126 from anywhere in Australia) at once.

SAFETY DIRECTIONS: Please refer to MSDS before use.
