Slow release plant nutrient

Noble Earth Technologies Soil health pellets are blended from mostly organic materials to give an all purpose slow release plant nutrient which improves and revitalises the structure of soil, improving the health and growth in plants, whilst encouraging earthworms and soil microbial activity.

DIRECTIONS FOR USE: TO IMPROVE SOIL CONDITION: spread Soil health pellets 1.5cm deep and fork or rack into soil four times a year, in spring, summer, autumn, and winter.

Can also be applied with water as a liquid. Mix the quantity of pellets required with water, let stand and remix until the pellets are solubilised. Approximately 1Kg of pellets can be dissolved in 20 litres of water. Apply the liquid according to the quantity of the pellets used at the set rate set out below for a purposed application.

SEEDLINGS: 35g or approximately half an adult handful placed around the roots of each plant is sufficient.

SIDE DRESSING: 70Kg or approximately one adult handful spread over every 120cm in a shallow drill covered with 2.5cm of soil beside each row of vegetables and flowers.

PERENNIALS: Apply 70Kg or approximately one adult handful spread over every 120cm at a drip line and cover with well watered leaf mulch three times a year in spring, autumn and winter.

FOR GOLF AND BOWELING GREENS: Apply the pellets at a renovation stage and or when coring. Cover the cover the pellets with normal top dressing. Probably mix the pellets the top dressing at a rate of application of 2.5kg of pellets per 50 square metres.

For a broad acre application use 200kg per hectare and plough in if possible.

For best results with the pellets always water after application.

Analysis (minimum) - All nutrients occur as organic form.

Total nitrogen (N)	1.4%	Total Phosphorus	0.5%	Total Potassium (k)	1.3%
Boron (B)	0.0023%	Calcium (Ca)	1.4%	Magnesium (Mn)	0.028%
Iron (Fe)	1.3%	Magnesium (Mg)	0.59%	Zinc (Zn)	0.0012%
Sulphur (S)	0.5%				
Contains 0.6% Mt Gipps Zeolite		Coarse materials	99%	Fine Material	1%

FIRST AID: For advice, contact a Poisons Information Centre (phone 13 1126 from anywhere in Australia) or a doctor at once.

SAFETY DIRECTIONS: Please read material safety data sheet before use.
