

Noble Earth Technologies  
**Stainless Steel Super Clean**

**CAUTION - POISON**

**KEEP OUT OF REACH OF CHILDREN**

CONTAINS 430g/L PHOSPHORIC ACID & 40g/L AMMONIUM BIFLUORIDE

Noble Earth Technologies 'Stainless Steel Super Clean' has been especially formulated to provide effective cleaning. Phosphoric Acid with the combination of Ammonium Bifluoride provide thorough and deep cleansing of all mineral salts, rusting, leaching, oxidation and other stains that occur through the natural weathering and exposure to the environment. Noble Earth Technologies 'Stainless Steel Super Clean' has an extremely wide variety of applications, with the addition of an acid tolerant detergent providing a medium for cleaning petroleum-based greases, dirt and fatty materials. 'Stainless Steel Super Clean' is ideal for vehicle and equipment maintenance where there is not only environmental soiling but also diesel fumes, greases and other contaminants that come into contact with the surfaces to be cleaned.

CORROSIVE LIQUID,  
TOXIC, N.O.S. UN 2922

**DIRECTIONS FOR USE:** Dilute 1 part of Noble Earth Technologies 'Stainless Steel Super Clean' with 15 parts of water. The diluted solution should be applied by brush or sprayed onto the surface by working from bottom to top. Allow for the product a few minutes to penetrate the dirt and corrosion, and then rinse off with water. 'Stainless Steel Super Clean' can then be used for periodic maintenance in a much weaker solution. Testing should take place before any stronger solutions are used in order to gauge the reaction as damage could occur to certain porcelain, glass, polished aluminium or tiled surfaces in heavily concentrated forms.

For further application details and technical information and uses please consult with the Noble Earth Technologies technical department.

**SAFETY DIRECTIONS:** Highly corrosive. Risk of serious and permanent damage. Contact with eyes, even for a short period, may cause blindness. Avoid contact with eyes and skin. Wear protective gloves when mixing or using. Avoid breathing vapour or spray mist. If used frequently, obtain a supply of calcium gluconate gel.

**FIRST AID:** If poisoning occurs, contact a Poisons Information Centre (phone 13 11 26 from anywhere in Australia) or a doctor. If swallowed, do NOT induce vomiting. If in eyes, hold eyelids apart and flush the eye continuously with running water. Continue flushing until advised by the Poisons Information Centre or a doctor, or at least 15 minutes. If on skin, remove contaminated clothing and flush skin under water for 15 minutes. Then apply calcium gluconate gel and contact the Poisons Information Centre or a doctor.
