## Plant Hydrous Nutrient

**KEEP OUT OF REACH OF CHILDREN  
READ SAFETY DIRECTIONS BEFORE OPENING OR USING**

N P K LIQUID FERTILIZER 21.5-5.9-6.2

ANALYSIS (Minimum):				
Nitrogen (N) as ammonium	4.9% w/v	Phosphorus (P) as water soluble	5.9% w/v	
Nitrogen (N) as urea	16.6% w/v	Potassium (K) as pyrophosphate	6.2% w/v	
Total Nitrogen (N)	21.5% w/v	Maximum blurt	0.4% w/v	Added water 19.3% w/v

### DIRECTIONS FOR USE:

**BOWLING GREENS:** Spring renovation: mix 1 Litre of NOBLE EARTH PLANT HYDROUS NUTRIENT with 50 Litres of water and apply this mix to 100m<sup>2</sup>. Feeding at regular intervals of 2-3 weeks will produce the best results.

**GROWTH PERIODS:** Apply a mix of 1 Litre of PLANT HYDROUS NUTRIENT with 100 Litres of water to 100m<sup>2</sup> at 2-3 week intervals during this growth period.

**GERNERAL TURF:** Use 1 Litre of PLANT HYDROUS NUTRIENT with 100Litres of water. This mix will feed 100m<sup>2</sup> of turf. Use 2-3 week intervals.

**FOLIAGE APPLICATON FOR GENERAL GROWTH AND GREENING:** 1 Litre of PLANT HYDROUS NUTRIENT may be diluted with 200 Litres of water and sprayed directly onto the foliage. Thoroughly wet the leaf during cool weather. **WARNING** not recommended for repeated foliar application to annual and perennial horticultural crops.

**TREE ROOT FEEDING:** 10 Litres of the solution containing 1 Litre of PLANT HYDROUS NUTRIENT to 80 Litres of water will produce a balanced nutrient feeding. This should be applied in autumn and spring. Punch holes in the ground around the base of the tree to allow good penetration.

**FIRST AID:** For advice, contact a Poisons Information Centre (phone 13 1126 from anywhere in Australia) or a doctor at once.

**SAFETY DIRECTIONS:** Please read material safety data sheet before use.
